INTRODUCTION

Web developer with a background in product and digital design. Experienced working with multidisciplinary squads under agile technology to identify pain points and find creative solutions while still meeting deadlines.

QUALIFICATIONS

- _Learned full-stack javascript development in 3-4 months
- _4 years of experience with Design, of which almost 2 years were in Product/UX/UI Design.
- _At Instacarro.com I participated in the conception and design for the new user flow, which resulted in a 50% increase in conversion rates.
- _Through Design Thinking at MJV, I helped our client determine a customer loyalty roadmap for their indirect salesforce and delivered an action plan to tackle major tension points and align the client with their sales agents.

SKILLS

- _Extremely fast learner
- _Front-end and back-end development using JS based technologies
- _Perceptive, insightful and creative problem solver
- _Working with multidisciplinary teams in a fast paced environment with agile development
- _On-site and online user testing, research and A/B testing
- _Wireframing and static and animated prototyping for both desktop and mobile (Figma, Sketch, Adobe XD, Invision, Marvel, Principle and others)
- _Experienced Adobe Creative Suite user
- _Video production, editing and basic motion graphics concepts
- _3D modelling and animation basics
- _Knowledge in Office apps
- _Native fluency in Portuguese and English
